environment division ■ recycling ■ scrap metal

We purchase ferrous and nonferrous scrap metal of all grades .

## **B**ramston & Associates offers a fast and personalised service for metal shredding and recycling.

Our network of collection facilities collect, process and recycle ferrous metals and nonferrous metals. We pride ourselves on serving the community with honesty and integrity. Our experienced staff guarantees each customer receives prompt attention, a helping hand, accurate information and fair assessment of their scrap metal load. The team includes individuals with over 20 years of experience in the scrap metal recycling industry, so our customers are assured competent help and accurate, competitive pricing. We take pride in our employees and maintain an on-going commitment to provide the most reliable service, efficient process, competitive pricing, environmental compliance, and high quality products available.

As part of our commitment, we are constantly investing in improvements to our facilities, technology, and way of doing business. We provide industrial suppliers with large onsite containers, custom equipment and other material handling services. The scrap is processed, sorted and prepared at our facilities for sale to steel mills, brokers and exporters internationally.

### **CUSTOMER SERVICE**

It's more than just prompt material pickups. Our engineering department can help you solve your scrap handling needs with custom designed solutions tailored to your specific situation.

We also handle the dismantling and removal of large machinery and equipment. If you have large items that you need to dispose of, call us and we can help.

Through the use of technology, we are able to generate a wide variety of computerised reports and graphs to help you track your scrap output.

### **RESPONSIBLE RECYCLING**

Our commitment to maintaining an environmentally sound workplace is demonstrated by our adoption of industry-developed comprehensive environmental operation guidelines. We support Design for Recycling- a policy to promote the design and manufacture of goods that, at the end of their useful life, can be recycled safely and efficiently.

If you want to meet with us, we're here.

## METAL RECYCLING

Across the world, we recycle million metric tons of metal scrap each year. The scrap metal industry is good for the economy by creating jobs and exports. Recycling scrap metal is also good for the environment by reducing greenhouse gas emissions and manufacturing energy usage. The amount of energy saved by using recycled metal versus virgin ore is 92% for aluminum, 90% for copper and 56% for steel as an example.

Metal recycling is also important for natural resource conservation.

- ◆ Recycling one ton of steel conserves 2,500 pounds of ire ore, 1,400 pounds of coal and 130 pounds of limestone
- ◆ Recycling one ton of aluminum conserves 8 tons of bauxite ore and 14 megawatt hours of electricity

Bramston & Associates offers full-service metal recycling for ferrous, non-ferrous, and miscellaneous metals.

Ferrous metals are mostly made up of steel and iron. Ferrous metal can be found in old vehicles, household appliances, yard and farming equipment, and steel previously used for structural purposes. Non-ferrous metals include those that do not contain iron or steel. These include nickel, copper, aluminum and many others. Miscellaneous metals can be found anywhere from batteries to old dvd players, bicycles, cell phone parts, auto parts, windows, doors, appliances.

We are proud to be a part of environmental conservation and are committed to the impact that recycling metal has on our environment. We aim to reduce metal manufacturing costs, mining, and increase quality metal products. Bramston & Associates can help you learn the importance and advantages of recycling scrap metal.

**Call us today to speak with one of our metal recycling experts.**

## CONTAINER PROGRAM

Bramston & Associates can is pleased to offer an on site container and removal program for the efficient collection and transport of scrap metal. We provide roll off containers that, once full, we will pick up and transport to one of our metal scrap recycling yards.

On site containers make sustainability initiatives for manufacturers easy and efficient. On site containers make demolition and clean up for commercial businesses fast and neat. We will work with you to see that your metal scrap collection and transport needs are met for minimum expense and maximum cash return.

**For more information about how you can utilise the container program at Bramston & Associates , call us to speak with a team member.**
